

Intern Software Developer (d/m/w)

You want to work on something meaningful? We make people healthier!

Do you want to have an impact? Do you want your work to make a difference and directly reach people and improve their health? With a wide variety of tasks and an enthusiastic team, we offer you the opportunity to enter the dynamic start-up scene in Munich.

We would like to actively prevent the illness of employees. Therefore, as a small start-up with flat hierarchies and with a high-level personal responsibility, we are developing a digital web platform that provides everything companies and their employees need – from specific health analyses to diverse prevention offerings. At work we focus on personal growth, as well as first-class teamwork and an outstanding working environment in interdisciplinary teams.

To further grow and support our team, we are looking for a Software Developer (Internship).

What distinguishes you?

- You are studying computer science or pursuing an equivalent qualification.
- Good knowledge in NodeJS, Angular 2+, HTML5/CSS/SASS, HTTP APIs, Git, PostgreSQL.
- Familiarity with microservices architecture and containerization (Docker, K8S).
- Basic understanding of the CI/CD process and how modern applications are structured.
- You can learn languages quickly if you have the desire to.
- You are passionate about optimizing processes and taking over responsibility.
- You are an ambitious team player and open-minded.
- Good written and verbal English skills, German skills are a plus.

What we offer you?

- A motivated and interdisciplinary international team.
- Further development and an open feedback culture.
- Flat hierarchies and fast decision-making processes.
- Flexible work conditions.
- Monthly team events.
- A relaxed and humorous atmosphere as well as the chance to help shape our company through your ideas.

Would you like to grow with us?

Have we sparked your interest? Then we look forward to receiving your application (letter of application, resume) via e-mail to jobs@medisinn.com. Feel free to share your **stack overflow** or **GitHub** profile with us!
